SUBJECT INDEX

Acceleration
Stochastic Model for Microgravity Excitation, Joseph Ellison, Goodarz Ahmadi and Carlos Grodsinsky, AS Apr. 95, p100-106.

Trivariate Spectral Modeling of Space Shuttle Flight Data, P. D. Spanos, R. R. Eberle, D. Hamilton and L. Mushung, AS July 95, p148-155.

Adhesive bonding
Environmental and Viscoelastic Effects on Stresses in Adhesive Joints, Anthony N. Palazotto and Victor Birman, AS Apr. 95, p107-118.

Aerodynamics
New Airfoil-Design Concept with Improved Aerodynamic Characteristics, Demeter G. Fertis, AS July 94, p328-339.

Aerospace engineering
Flight Mechanics of High Performance Aircraft by Prof. Nguyen X. Vinh, Rama K. Yedavalli, AS July 95, p164.

Agricultural engineering
Methodology for Optimal Plant Growth Strategies in Life-Support Systems, Joseph N. Eisenberg, Don R. Maszle, Christopher Pawlowski and David M. Auslander, AS July 95, p139-147.

Agriculture
Methodology for Optimal Plant Growth Strategies in Life-Support Systems, Joseph N. Eisenberg, Don R. Maszle, Christopher Pawlowski and David M. Auslander, AS July 95, p139-147.

Aircraft
Multigrid Computation of Flow Past Airfoil Using k-ϵ Turbulence Model, Yong Zhao and Damodaran Murali, AS Oct. 95, p180-188.

New Airfoil-Design Concept with Improved Aerodynamic Characteristics, Demeter G. Fertis, AS July 94, p328-339.

Aircraft technology
Flight Mechanics of High Performance Aircraft by Prof. Nguyen X. Vinh, Rama K. Yedavalli, AS July 95, p164.

New Airfoil-Design Concept with Improved Aerodynamic Characteristics, Demeter G. Fertis, AS July 94, p328-339.

Airfields
Spectral Reflectance Properties of Different Types of Built-Up Surfaces, Ramesh P. Singh and Anand Sirohi, AS Jan. 95, p25-31.

Algorithms
Distributed Genetic Algorithm for Structural Optimization, Hojjat Adeli and Sanjay Kumar, AS July 95, p156-163.

Parallel-Vector Algorithms for Analysis of Large Structures, R. Soegiarso and H. Adeli, AS Jan. 95, p54-67.

Approximation methods
Simplified Design Method for Braced Double Skinned Structure in Lunar Application, Ramesh B. Malla, Hamid R. Adib-Jahromi and Michael L. Accorsi, AS Oct. 95, p189-195.

Automation
Fundamental Analysis of Robotic Excavation, A. Hemami, AS Oct. 95, p175-179.

Intelligent Excavator Control System for Lunar Mining System, Paul J. A. Lever and Fei-Yue Wang, AS Jan. 95, p16-24.

Auto-regressive models
Trivariate Spectral Modeling of Space Shuttle Flight Data, P. D. Spanos, R. R. Eberle, D. Hamilton and L. Mushung, AS July 95, p148-155.

Basalt
Properties of Lunar Soil Simulant JSC-1, Brian M. Willman, Walter W. Boles, David S. McKay and Carlton C. Allen, AS Apr. 95, p77-87.

Base isolation
Vibration Isolation of Launch Vehicle Payload and Its Subsystem, Gina Lee-Glauser and Goodarz Ahmadi, AS Jan. 95, p1-8.

Beams
Beam-Type Bending of Space-Based Inflated Membrane Structures, John A. Main, Steven W. Peterson and Alvin M. Strauss, AS Apr. 95, p120-125.

Bending
Beam-Type Bending of Space-Based Inflated Membrane Structures, John A. Main, Steven W. Peterson and Alvin M. Strauss, AS Apr. 95, p120-125.

Bracing
Simplified Design Method for Braced Double Skinned Structure in Lunar Application, Ramesh B. Malla, Hamid R. Adib-Jahromi and Michael L. Accorsi, AS Oct. 95, p189-195.

Buckling
Postbuckling and Crippling of I-Section Composite Stiffeners, Levend Parnas, Erian A. Armanios, P. Sriram and Lawrence Rehfield, AS Jan. 95, p32-42.

Cantilevers
Flutter of Cantilevered Column Under Rocket Thrust, Yoshihiko Sugiyama, Kazuo Katayama and Sigeru Kinoi, AS Jan. 95, p9-15.

Columns
Flutter of Cantilevered Column Under Rocket Thrust, Yoshihiko Sugiyama, Kazuo Katayama and Sigeru Kinoi, AS Jan. 95, p9-15.

Composite structures
Nonlinear Response and Failure of Pressurized Composite Curved Panels, Richard L. Boitnott, James H. Starnes, Jr. and Eric R. Johnson, AS July 95, p129-138.

Postbuckling and Crippling of I-Section Composite Stiffeners, Levend Parnas, Erian A. Armanios, P. Sriram and Lawrence Rehfield, AS Jan. 95, p32-42.

Construction methods
Soil-Tool Interaction Theories as They Apply to Lunar Soil Simulant, Brian M. Willman and Walter W. Boles, AS Apr. 95, p88-99.

Control systems
Intelligent Excavator Control System for Lunar Mining System, Paul J. A. Lever and Fei-Yue Wang, AS Jan. 95, p16-24.

Cylindrical shells
Nonlinear Response and Failure of Pressurized Composite Curved Panels, Richard L. Boitnott, James H. Starnes, Jr. and Eric R. Johnson, AS July 95, p129-138.

Damping
Flutter of Cantilevered Column Under Rocket Thrust, Yoshihiko Sugiyama, Kazuo Katayama and Sigeru Kinoi, AS Jan. 95, p9-15.

Data collection
Trivariate Spectral Modeling of Space Shuttle Flight Data, P. D. Spanos, R. R. Eberle, D. Hamilton and L. Mushung, AS July 95, p148-155.

Deformation
Mixed Finite-Element Analysis of Thick Doubly Curved Laminated Shells, Chih-Ping Wu and Chi-Chuan Liu, AS Jan. 95, p43-53.

Design
New Airfoil-Design Concept with Improved Aerodynamic Characteristics, Demeter G. Fertis, AS July 94, p328-339.

Weld Joint Design for EVA Repair of On-Orbit Fluid Systems, Steven D. Jolly, AS Oct. 95, p165-174.

Distributed processing
Distributed Genetic Algorithm for Structural Optimization, Hojjat Adeli and Sanjay Kumar, AS July 95, p156-163.

Drag
New Airfoil-Design Concept with Improved Aerodynamic Characteristics, Demeter G. Fertis, AS July 94, p328-339.

Elastic analysis
Mixed Finite-Element Analysis of Thick Doubly Curved Laminated Shells, Chih-Ping Wu and Chi-Chuan Liu, AS Jan. 95, p43-53.

Environmental factors
Intelligent Excavator Control System for Lunar Mining System, Paul J. A. Lever and Fei-Yue Wang, AS Jan. 95, p16-24.

Environmental issues
Environmental and Viscoelastic Effects on Stresses in Adhesive Joints, Anthony N. Palazotto and Victor Birman, AS Apr. 95, p107-118.

Equipment
Intelligent Excavator Control System for Lunar Mining System, Paul J. A. Lever and Fei-Yue Wang, AS Jan. 95, p16-24.

Excavation
Fundamental Analysis of Robotic Excavation, A. Hemami, AS Oct. 95, p175-179.

Intelligent Excavator Control System for Lunar Mining System, Paul J. A. Lever and Fei-Yue Wang, AS Jan. 95, p16-24.

Soil-Tool Interaction Theories as They Apply to Lunar Soil Simulant, Brian M. Willman and Walter W. Boles, AS Apr. 95, p88-99.

Excitation
Stochastic Model for Microgravity Excitation, Joseph Ellison, Goodarz Ahmadi and Carlos Grodsinsky, AS Apr. 95, p100-106.

Extraterrestrial bases
Soil-Tool Interaction Theories as They Apply to Lunar Soil Simulant, Brian M. Willman and Walter W. Boles, AS Apr. 95, p88-99.

Fabrics
Beam-Type Bending of Space-Based Inflated Membrane Structures, John A. Main, Steven W. Peterson and Alvin M. Strauss, AS Apr. 95, p120-125.

Failure modes
Postbuckling and Crippling of I-Section Composite Stiffeners, Levend Parnas, Erian A. Armanios, P. Sriram and Lawrence Rehfield, AS Jan. 95, p32-42.

Failures
Nonlinear Response and Failure of Pressurized Composite Curved Panels, Richard L. Boitnott, James H. Starnes, Jr. and Eric R. Johnson, AS July 95, p129-138.

Fasteners
To Outer Space on a Tether, Li Liu, AS Apr. 95, p126-128.

Finite element method
Simplified Design Method for Braced Double Skinned Structure in Lunar Application, Ramesh B. Malla, Hamid R. Adib-Jahromi and Michael L. Accorsi, AS Oct. 95, p189-195.

Finite elements
Mixed Finite-Element Analysis of Thick Doubly Curved Laminated Shells, Chih-Ping Wu and Chi-Chuan Liu, AS Jan. 95, p43-53.

Fluid dynamics
Multigrid Computation of Flow Past Airfoil Using k-ϵ Turbulence Model, Yong Zhao and Damodaran Murali, AS Oct. 95, p180-188.

Flutter
Flutter of Cantilevered Column Under Rocket Thrust, Yoshihiko Sugiyama, Kazuo Katayama and Sigeru Kinoi, AS Jan. 95, p9-15.

Force
Flutter of Cantilevered Column Under Rocket Thrust, Yoshihiko Sugiyama, Kazuo Katayama and Sigeru Kinoi, AS Jan. 95, p9-15.

Fuzzy sets
Intelligent Excavator Control System for Lunar Mining System, Paul J. A. Lever and Fei-Yue Wang, AS Jan. 95, p16-24.

Gravity
Stochastic Model for Microgravity Excitation, Joseph Ellison, Goodarz Ahmadi and Carlos Grodsinsky, AS Apr. 95, p100-106.

I beams
Postbuckling and Crippling of I-Section Composite Stiffeners, Levend Parnas, Erian A. Armanios, P. Sriram and Lawrence Rehfield, AS Jan. 95, p32-42.

Inflatable structures
Beam-Type Bending of Space-Based Inflated Membrane Structures, John A. Main, Steven W. Peterson and Alvin M. Strauss, AS Apr. 95, p120-125.

Internal pressure
Nonlinear Response and Failure of Pressurized Composite Curved Panels, Richard L. Boitnott, James H. Starnes, Jr. and Eric R. Johnson, AS July 95, p129-138.

Joint ventures
Compatibility of Russian Life-Support Systems to Future Space Missions, Kathleen M. Leonard and Valery K. Aksamentov, AS Jan. 95, p68-74.

Joints
Weld Joint Design for EVA Repair of On-Orbit Fluid Systems, Steven D. Jolly, AS Oct. 95, p165-174.

Joints, bonded
Environmental and Viscoelastic Effects on Stresses in Adhesive Joints, Anthony N. Palazotto and Victor Birman, AS Apr. 95, p107-118.

Laboratory tests
Spectral Reflectance Properties of Different Types of Built-Up Surfaces, Ramesh P. Singh and Anand Sirohi, AS Jan. 95, p25-31.

Laminates
Mixed Finite-Element Analysis of Thick Doubly Curved Laminated Shells, Chih-Ping Wu and Chi-Chuan Liu, AS Jan. 95, p43-53.

Life support systems
Compatibility of Russian Life-Support Systems to Future Space Missions, Kathleen M. Leonard and Valery K. Aksamentov, AS Jan. 95, p68-74.

Methodology for Optimal Plant Growth Strategies in Life-Support Systems, Joseph N. Eisenberg, Don R. Maszle, Christopher Pawlowski and David M. Auslander, AS July 95, p139-147.

Lift
New Airfoil-Design Concept with Improved Aerodynamic Characteristics, Demeter G. Fertis, AS July 94, p328-339.

Local area networks
Distributed Genetic Algorithm for Structural Optimization, Hojjat Adeli and Sanjay Kumar, AS July 95, p156-163.

Logic programming languages
Intelligent Excavator Control System for Lunar Mining System, Paul J. A. Lever and Fei-Yue Wang, AS Jan. 95, p16-24.

Materials, properties
Properties of Lunar Soil Simulant JSC-1, Brian M. Willman, Walter W. Boles, David S. McKay and Carlton C. Allen, AS Apr. 95, p77-87.

Materials testing
Properties of Lunar Soil Simulant JSC-1, Brian M. Willman, Walter W. Boles, David S. McKay and Carlton C. Allen, AS Apr. 95, p77-87.

Mechanical properties
Soil-Tool Interaction Theories as They Apply to Lunar Soil Simulant, Brian M. Willman and Walter W. Boles, AS Apr. 95, p88-99.

Membranes
Beam-Type Bending of Space-Based Inflated Membrane Structures, John A. Main, Steven W. Peterson and Alvin M. Strauss, AS Apr. 95, p120-125.

Models
Multigrid Computation of Flow Past Airfoil Using k-ϵ Turbulence Model, Yong Zhao and Damodaran Murali, AS Oct. 95, p180-188.

Moon
Intelligent Excavator Control System for Lunar Mining System, Paul J. A. Lever and Fei-Yue Wang, AS Jan. 95, p16-24.

Properties of Lunar Soil Simulant JSC-1, Brian M. Willman, Walter W. Boles, David S. McKay and Carlton C. Allen, AS Apr. 95, p77-87.

Simplified Design Method for Braced Double Skinned Structure in Lunar Application, Ramesh B. Malla, Hamid R. Adib-Jahromi and Michael L. Accorsi, AS Oct. 95, p189-195.

Soil-Tool Interaction Theories as They Apply to Lunar Soil Simulant, Brian M. Willman and Walter W. Boles, AS Apr. 95, p88-99.

To Outer Space on a Tether, Li Liu, AS Apr. 95, p126-128.

Nonlinear analysis
Nonlinear Response and Failure of Pressurized Composite Curved Panels, Richard L. Boitnott, James H. Starnes, Jr. and Eric R. Johnson, AS July 95, p129-138.

Numerical calculations
Multigrid Computation of Flow Past Airfoil Using k-ϵ Turbulence Model, Yong Zhao and Damodaran Murali, AS Oct. 95, p180-188.

Nutritional requirements
Methodology for Optimal Plant Growth Strategies in Life-Support Systems, Joseph N. Eisenberg, Don R. Maszle, Christopher Pawlowski and David M. Auslander, AS July 95, p139-147.

Optimization
Distributed Genetic Algorithm for Structural Optimization, Hojjat Adeli and Sanjay Kumar, AS July 95, p156-163.

Methodology for Optimal Plant Growth Strategies in Life-Support Systems, Joseph N. Eisenberg, Don R. Maszle, Christopher Pawlowski and David M. Auslander, AS July 95, p139-147.

Panels
Nonlinear Response and Failure of Pressurized Composite Curved Panels, Richard L. Boitnott, James H. Starnes, Jr. and Eric R. Johnson, AS July 95, p129-138.

Parallel processing
Distributed Genetic Algorithm for Structural Optimization, Hojjat Adeli and Sanjay Kumar, AS July 95, p156-163.

Parallel-Vector Algorithms for Analysis of Large Structures, R. Soegiarso and H. Adeli, AS Jan. 95, p54-67.

Passive control
Vibration Isolation of Launch Vehicle Payload and Its Subsystem, Gina Lee-Glauser and Goodarz Ahmadi, AS Jan. 95, p1-8.

Performance
Flight Mechanics of High Performance Aircraft by Prof. Nguyen X. Vinh, Rama K. Yedavalli, AS July 95, p164.

Performance characteristics
Flight Mechanics of High Performance Aircraft by Prof. Nguyen X. Vinh, Rama K. Yedavalli, AS July 95, p164.

Performance evaluation
Flight Mechanics of High Performance Aircraft by Prof. Nguyen X. Vinh, Rama K. Yedavalli, AS July 95, p164.

Photosynthesis
Methodology for Optimal Plant Growth Strategies in Life-Support Systems, Joseph N. Eisenberg, Don R. Maszle, Christopher Pawlowski and David M. Auslander, AS July 95, p139-147.

Postbuckling behavior
Postbuckling and Crippling of I-Section Composite Stiffeners, Levend Parnas, Erian A. Armanios, P. Sriram and Lawrence Rehfield, AS Jan. 95, p32-42.

Process control
Fundamental Analysis of Robotic Excavation, A. Hemami, AS Oct. 95, p175-179.

Random processes
Trivariate Spectral Modeling of Space Shuttle Flight Data, P. D. Spanos, R. R. Eberle, D. Hamilton and L. Mushung, AS July 95, p148-155.

Reflectance
Spectral Reflectance Properties of Different Types of Built-Up Surfaces, Ramesh P. Singh and Anand Sirohi, AS Jan. 95, p25-31.

Regeneration
Methodology for Optimal Plant Growth Strategies in Life-Support Systems, Joseph N. Eisenberg, Don R. Maszle, Christopher Pawlowski and David M. Auslander, AS July 95, p139-147.

Remote sensing
Spectral Reflectance Properties of Different Types of Built-Up Surfaces, Ramesh P. Singh and Anand Sirohi, AS Jan. 95, p25-31.

Repairing
Weld Joint Design for EVA Repair of On-Orbit Fluid Systems, Steven D. Jolly, AS Oct. 95, p165-174.

Reynolds number
Multigrid Computation of Flow Past Airfoil Using k-ϵ Turbulence Model, Yong Zhao and Damodaran Murali, AS Oct. 95, p180-188.

Roads
Spectral Reflectance Properties of Different Types of Built-Up Surfaces, Ramesh P. Singh and Anand Sirohi, AS Jan. 95, p25-31.

Robotics
Fundamental Analysis of Robotic Excavation, A. Hemami, AS Oct. 95, p175-179.

Roofs
Simplified Design Method for Braced Double Skinned Structure in Lunar Application, Ramesh B. Malla, Hamid R. Adib-Jahromi and Michael L. Accorsi, AS Oct. 95, p189-195.

Russia
Compatibility of Russian Life-Support Systems to Future Space Missions, Kathleen M. Leonard and Valery K. Aksamentov, AS Jan. 95, p68-74.

Satellites
Spectral Reflectance Properties of Different Types of Built-Up Surfaces, Ramesh P. Singh and Anand Sirohi, AS Jan. 95, p25-31.

To Outer Space on a Tether, Li Liu, AS Apr. 95, p126-128.

Shell structures
Mixed Finite-Element Analysis of Thick Doubly Curved Laminated Shells, Chih-Ping Wu and Chi-Chuan Liu, AS Jan. 95, p43-53.

Simulation
Properties of Lunar Soil Simulant JSC-1, Brian M. Willman, Walter W. Boles, David S. McKay and Carlton C. Allen, AS Apr. 95, p77-87.

Soil-Tool Interaction Theories as They Apply to Lunar Soil Simulant, Brian M. Willman and Walter W. Boles, AS Apr. 95, p88-99.

Soils
Properties of Lunar Soil Simulant JSC-1, Brian M. Willman, Walter W. Boles, David S. McKay and Carlton C. Allen, AS Apr. 95, p77-87.

Soil-Tool Interaction Theories as They Apply to Lunar Soil Simulant, Brian M. Willman and Walter W. Boles, AS Apr. 95, p88-99.

Space exploration
Compatibility of Russian Life-Support Systems to Future Space Missions, Kathleen M. Leonard and Valery K. Aksamentov, AS Jan. 95, p68-74.

Space shuttle orbiter
Trivariate Spectral Modeling of Space Shuttle Flight Data, P. D. Spanos, R. R. Eberle, D. Hamilton and L. Mushung, AS July 95, p148-155.

Vibration Isolation of Launch Vehicle Payload and Its Subsystem, Gina Lee-Glauser and Goodarz Ahmadi, AS Jan. 95, p1-8.

Space stations
Stochastic Model for Microgravity Excitation, Joseph Ellison, Goodarz Ahmadi and Carlos Grodsinsky, AS Apr. 95, p100-106.

Weld Joint Design for EVA Repair of On-Orbit Fluid Systems, Steven D. Jolly, AS Oct. 95, p165-174.

Space structures
Beam-Type Bending of Space-Based Inflated Membrane Structures, John A. Main, Steven W. Peterson and Alvin M. Strauss, AS Apr. 95, p120-125.

Parallel-Vector Algorithms for Analysis of Large Structures, R. Soegiarso and H. Adeli, AS Jan. 95, p54-67.

Spacecraft
To Outer Space on a Tether, Li Liu, AS Apr. 95, p126-128.

Spacecraft launching sites
To Outer Space on a Tether, Li Liu, AS Apr. 95, p126-128.

Spectral reflectance
Spectral Reflectance Properties of Different Types of Built-Up Surfaces, Ramesh P. Singh and Anand Sirohi, AS Jan. 95, p25-31.

Stability
Flutter of Cantilevered Column Under Rocket Thrust, Yoshihiko Sugiyama, Kazuo Katayama and Sigeru Kinoi, AS Jan. 95, p9-15.

State-of-the-art reviews
Environmental and Viscoelastic Effects on Stresses in Adhesive Joints, Anthony N. Palazotto and Victor Birman, AS Apr. 95, p107-118.

Fundamental Analysis of Robotic Excavation, A. Hemami, AS Oct. 95, p175-179.

Steel structures
Distributed Genetic Algorithm for Structural Optimization, Hojjat Adeli and Sanjay Kumar, AS July 95, p156-163.

Stiffeners
Postbuckling and Crippling of I-Section Composite Stiffeners, Levend Parnas, Erian A. Armanios, P. Sriram and Lawrence Rehfield, AS Jan. 95, p32-42.

Stochastic models
Stochastic Model for Microgravity Excitation, Joseph Ellison, Goodarz Ahmadi and Carlos Grodsinsky, AS Apr. 95, p100-106.

Stress
Environmental and Viscoelastic Effects on Stresses in Adhesive Joints, Anthony N. Palazotto and Victor Birman, AS Apr. 95, p107-118.

Stress analysis
Weld Joint Design for EVA Repair of On-Orbit Fluid Systems, Steven D. Jolly, AS Oct. 95, p165-174.

Structural analysis
Parallel-Vector Algorithms for Analysis of Large Structures, R. Soegiarso and H. Adeli, AS Jan. 95, p54-67.

Structural design
Simplified Design Method for Braced Double Skinned Structure in Lunar Application, Ramesh B. Malla, Hamid R. Adib-Jahromi and Michael L. Accorsi, AS Oct. 95, p189-195.

Subsystems
Vibration Isolation of Launch Vehicle Payload and Its Subsystem, Gina Lee-Glauser and Goodarz Ahmadi, AS Jan. 95, p1-8.

Tall buildings
Parallel-Vector Algorithms for Analysis of Large Structures, R. Soegiarso and H. Adeli, AS Jan. 95, p54-67.

Technology
Compatibility of Russian Life-Support Systems to Future Space Missions, Kathleen M. Leonard and Valery K. Aksamentov, AS Jan. 95, p68-74.

Thin wall structures
Postbuckling and Crippling of I-Section Composite Stiffeners, Levend Parnas, Erian A. Armanios, P. Sriram and Lawrence Rehfield, AS Jan. 95, p32-42.

Three-dimensional analysis
Mixed Finite-Element Analysis of Thick Doubly Curved Laminated Shells, Chih-Ping Wu and Chi-Chuan Liu, AS Jan. 95, p43-53.

Thrust
Flutter of Cantilevered Column Under Rocket Thrust, Yoshihiko Sugiyama, Kazuo Katayama and Sigeru Kinoi, AS Jan. 95, p9-15.

Turbulent flow
Multigrid Computation of Flow Past Airfoil Using k-ϵ Turbulence Model, Yong Zhao and Damodaran Murali, AS Oct. 95, p180-188.

Vector analysis
Parallel-Vector Algorithms for Analysis of Large Structures, R. Soegiarso and H. Adeli, AS Jan. 95, p54-67.

Vibration control
Stochastic Model for Microgravity Excitation, Joseph Ellison, Goodarz Ahmadi and Carlos Grodsinsky, AS Apr. 95, p100-106.

Vibration Isolation of Launch Vehicle Payload and Its Subsystem, Gina Lee-Glauser and Goodarz Ahmadi, AS Jan. 95, p1-8.

Viscoelasticity
Environmental and Viscoelastic Effects on Stresses in Adhesive Joints, Anthony N. Palazotto and Victor Birman, AS Apr. 95, p107-118.

Welding
Weld Joint Design for EVA Repair of On-Orbit Fluid Systems, Steven D. Jolly, AS Oct. 95, p165-174.

Parallel-Vector Algorithms for Analysis of Large Structures, with H. Adeli, AS Jan. 95, p54-67

Spanos, P. D.
Trivariate Spectral Modeling of Space Shuttle Flight Data, with R. R. Eberle, D. Hamilton and L. Mushung, AS July 95, p148-155

Sriram, P.
see Parnas, Levend, AS Jan. 95, p32-42

Starnes, James H., Jr.
see Boitnott, Richard L., AS July 95, p129-138

Strauss, Alvin M.
see Main, John A., AS Apr. 95, p120-125

Sugiyama, Yoshihiko
Flutter of Cantilevered Column Under Rocket Thrust, with Kazuo Katayama and Sigeru Kinoi, AS Jan. 95, p9-15

Wang, Fei-Yue
see Lever, Paul J. A., AS Jan. 95, p16-24

Willman, Brian M.
Properties of Lunar Soil Simulant JSC-1, with Walter W. Boles, David S. McKay and Carlton C. Allen, AS Apr. 95, p77-87
Soil-Tool Interaction Theories as They Apply to Lunar Soil Simulant, with Walter W. Boles, AS Apr. 95, p88-99

Wu, Chih-Ping
Mixed Finite-Element Analysis of Thick Doubly Curved Laminated Shells, with Chi-Chuan Liu, AS Jan. 95, p43-53

Yedavalli, Rama K.
Flight Mechanics of High Performance Aircraft by Prof. Nguyen X. Vinh, AS July 95, p164

Zhao, Yong
Multigrid Computation of Flow Past Airfoil Using k-ϵ Turbulence Model, with Damodaran Murali, AS Oct. 95, p180-188
